| <p><b>1. CUSTOMER SEGMENT(S) [CS]</b> Home users, students, IT professionals, remote workers, small businesses, and network administrators who require simple network management.</p> | <p><b>6. CUSTOMER LIMITATIONS</b><br/>EG. BUDGET, DEVICES [CL] Limited networking knowledge, limited budget, different devices and operating systems, and difficulty understanding technical information.</p> | <p><b>5. AVAILABLE SOLUTIONS</b><br/>PROS &amp; CONS [AS]<br/><b>Existing solutions:</b> Internet service provider support, network monitoring software, online troubleshooting guides.<br/><b>Pros:</b> Easily available and reliable.<br/><b>Cons:</b> Require technical skills, manual effort, and lack personalization</p> |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|

**2. PROBLEMS / PAINS**  
**+ ITS FREQUENCY [PR]**  
Frequent internet connectivity issues, slow network speed, difficulty in troubleshooting, lack of technical knowledge, and delayed support. These problems occur regularly during network usage.

**3. TRIGGERS TO ACT**  
**[TR]** Poor internet performance, connection failures, security warnings, unknown connected devices, and need for immediate network assistance.

**4. EMOTIONS**  
**BEFORE / AFTER [EM]**  
**Before:** Frustration, confusion, inconvenience, and stress during network failures.  
**After:** Relief, confidence, and easy control over network activities.

**9. PROBLEM ROOT / CAUSE [RC]** Lack of an intelligent personalized system that can automatically analyze network conditions and provide user-specific solutions.

**10. YOUR SOLUTION**  
**[SL]** Develop an AI-powered Personalized Network Assistant that monitors network performance, detects issues, provides customized troubleshooting steps, sends alerts, and assists users through text/voice interaction.

**7. BEHAVIOR**  
**+ ITS INTENSITY [BE]**  
Users frequently restart routers, check internet speed, search online solutions, and contact support when network issues occur.

**8. CHANNELS OF BEHAVIOR [CH]**

**ONLINE Online:** Mobile application, web dashboard, AI chatbot, voice assistant.

**OFFLINE Offline:** Customer care, technicians, IT support centers
