

Solution Architecture

Date	5 july 2026
Team ID	xxxxxxx
Project Name	Personalized network assistant
Maximum Marks	5 Marks

Solution Architecture Diagram:

Provide a high-level visual representation of your solution's architecture. Use the structural layout below as a template to map out your Presentation Layer, Application Layer, and Data Layer. Fill in the specific technologies and components for your project directly into the boxes to create your architectural diagram.

Component Description Table

Component Name	Description / Role in Architecture	Technologies Used
<i>[Presentation Layer]</i>	Provides user interface to interact with the network assistant and display network insights	React.js, HTML, CSS, Flutter
<i>[API Gateway]</i>	<i>Manages requests between client and backend services and provides secure communication.</i>	Nginx, AWS API Gateway
<i>[Microservices]</i>	<i>Handles authentication, AI processing, network analysis, and recommendation generation.</i>	Python Flask/Django, ML Models
<i>[Database]</i>	Stores user details, network data, device information, and activity logs.	MongoDB, PostgreSQL
